

TRIPLE & DUAL RECTIFIER® SOLO HEADS

*When does a product become a classic?
When its impact helps shape a generation.*

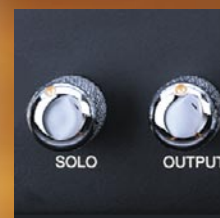

Still entirely hand-built in California, our Dual and Triple Rectifier® Solo Heads have kept our irons hot for fifteen raging years, trying to meet the world-wide demand for this high-gain menace. If the legions of hard-core devotees and their hit recordings haven't convinced you this is the real thing, then take your guitar and audition the Duals and Triples against their many imitators. Then *you* decide.

Channel One features Clean and Pushed voicings for sparkling cleans or mid-gain rhythm sounds.

Configure to Taste: Channels Two & Three can be devastating rhythm or lead channels that each include Raw, Vintage and Modern modes.

Solo feature provides a presettable and footswitchable volume boost for stepping out in any channel when it's your time to shine. Patent #6,724,897

Recto® Power comes in many configurations. Swap the stock 6L6 tubes for EL-34s with the Bias Switch. Match the style of rectifier (tube or silicon diodes) to suit your musical tastes, changing the sound and feel. Pat.5,168,438. Control the A.C. voltage with our built-in Variac to be tight and BOLD or brown and SPONGY to tune the power clip. Patent 5,091,700.

Recto Command. Tough, stage-worthy, five button footcontroller gives you instant access to all the Recto's channels and important functions. Wide switch spacing prevents embarrassing tone accidents...even when wearing popular urban assault footwear.
